Excellent lectures. Occasionally details of proofs dragged on a bit, but they were never too complicated, so paying attention and coming to class was always worth it. Prof. Ernst is an excellent lecturer, and engages the class well. He was always well-prepared for class, and was clearly very comfortable lecturing on the course material. I also enjoyed the occasional historical/cultural comment on the development of probability theory as a field.

He is an incredible professor. Despite not returning the grades sooner, he explains everything so clear. He might look intimidating, but he is in fact really accessible and helpful. There's no doubt that he will become, or already is, a big name in the field of applied probability. Hope he can stay at Rice and chair the department sometime in the future to save us.....

Prof. Ernst is a great lecturer. He's one of those professors who make you learn through insightful lectures instead of hard assignments. After every lecture, I felt that I had a better intuition of how to think about probability concepts.
